

# Learn to Fly - 7x7 Intro Course

## So you want to learn to fly?

Smartair's 7x7 Intro Course gives you 7 hours' flying time in 7 lessons for only \$1500, so you can sensibly decide if flying is the career or hobby for you.

Please contact a Smartair flying instructor to book your lesson or find out more.

Or you can visit us at:  
11-12 Avalon Street, Albury Airport, or  
1 PJ Moodie Drive, Bathurst Airport

(But call us first to make sure the right person is there to meet you.)

## What is the 7x7 Intro Course?

The *7x7 Intro* Course is the smart way to try flying before you invest in a full training course: in other words it is designed to expose a prospective pilot to the world of aviation. Do you just want to satisfy your curiosity, have fun earning your wings for recreational flying, or have dreams of becoming a professional career pilot? Then this course is the perfect way to get in the air and learn the basics.

## Who can do the course?

Just about anyone. You don't need a medical or a licence application so it's a straightforward way to get started. While some people find it easier than others, we know that with a bit of effort, almost anyone can reach the required standard. You might like to try our Trial Instructional Flight (TIF) first.

## What does the course involve?

You will receive 7 x 2-hour lessons for an all-inclusive fee of \$1500. Lessons will include a ground briefing as well as a total of 7 hours flight time.

The lessons are:

1. The effect of controls
2. Straight and level
3. Climbing and descending
4. Turning
5. Stall recovery
6. Revision
7. Circuits

You begin each session discussing the theory and principles behind each skill set with your instructor, who will also answer any questions you might have. You'll then jump into the pilot seat with your instructor beside you, and take to the sky. You'll also receive a concise learning guide as part of the course.

## How long is the course?

Quick answer: **two months**.

The course is very flexible and bookings can be made at times that suit you and your instructor. But because we're only human, breaks in learning inevitably lead to us forgetting important information, so we strongly recommend all seven lessons be completed within two months.

## What if I want to learn more?

As the name suggests, the course is designed as an introduction to the world of aviation. It is a complete course in itself for those simply wanting to learn how to fly an aircraft, or alternatively, it can be the first step towards an ongoing hobby or career.

After completing the *7x7 Intro* Course, the next step is to go solo. You will have already learnt the basics, so then it's a matter of practicing until you can fly on your own. You then learn to navigate using charts and navigation aids, and progress towards a Private Pilot Licence.

After that, a Commercial Pilot Licence, Night Rating and Multi Engine Instrument Rating are all within reach. Just ask your instructor for more details about further training.
