

TRIAL INSTRUCTIONAL FLIGHT

If your wanting to learn to fly but never really known how to make a start or are looking for that perfect gift. The trial instructional flight is a great investment for any future aviator!

The Trial Instructional Flight (TIF) is no joy flight. It's a 30- or 60-minute hands-on lesson where you take control and get to fly our purpose-built Tomahawk training aircraft. You'll be one-on-one with an instructor who will be giving you a pre-flight briefing about aircraft systems.

Our TIF's give you a feel for what it's like to fly an aeroplane. The TIF is a valuable teaching process which results in fewer surprises for new trainee pilots when they start the further licences like the Recreational, Private and or Commercial Licence.

This initial investment in a Trial Instructional Flight (TIF) is just \$150 for the 30-minute flight or \$275 for the comprehensive 60-minute experience.

You will learn about:

- Start-up procedure
- Radio communications
- Taxing
- Take-off
- Departure
- Controlling the aircraft
- Joining circuit and landing

See the world, how we see it. Explore through the aircraft windows at the horizons beyond, while our trained pilots safely guide you through flying the aircraft.

ABOUT SMARTAIR

Smartair provides a range of aviation charter, training and maintenance services. We operate a fleet of aircraft ranging from small trainers to a fast & luxurious turbo prop for corporate charters. Smartair is family owned and operated since founding in 1968.
