

# ABOUT US

Smartair provides a wide range of aviation charter, training and maintenance services anywhere in Australia, from our headquarters in Albury, NSW.

Smartair operates a fleet of aircraft ranging from small trainers to a fast and luxurious turbo prop for corporate charters. We also provide a comprehensive range of aircraft maintenance services. Over the years, our flying training division has helped countless pilots take to the skies.

Founded in 1968, Smartair is still family owned and operated. Until recently, Smartair was known as Air Centre Albury, however organisational change and increased capabilities have led us to a name change and image.

At Smartair, we believe customer service is paramount, and working smarter is the key to business success.

Effects of controls  
Straight & level  
Climbing &  
descending  
Turning  
Stall recovery

### Theory Component

Aerodynamics  
Air Law  
Emergency  
procedure  
Radio Theory

## When does it run and how much?

We will be running this course on the:

11th - 15th January 2021

The overall price of the course is \$1400.00.

**At Smartair, we have a current and active COVID-19 plan. We adhere to current Government rules and regulations. For more information, please check out <https://www.smartair.com.au/news/covid-19-return-to-flying-training-plan/>**

## What is the course?

The course is designed to give students who want to make aviation their career, a head start. It's the smart way for budding aviators to get a taste of flying - because they actually get in the air and learn the basics. Students can then make an informed choice about becoming a career pilot or a recreational flyer.

## Who can do the course?

Just about anyone who is capable of controlling an aircraft. Our focus is on school students who can't wait to get started in their aviation career, but maybe you've enjoyed a Trial Instructional Flight (TIF) and want to learn more. You don't need a medical or a license application, so it's a straightforward way to get started.

## Whats Included?

- Pilots Logbook
- RPL Study Guide
- 5 Briefings
- 5 one hour flights (one-on-one with flight instructor)

## What does the course involve?

Smartair instructors teach the basics of flying, both flying practice and theory over a 5 day period. Classes run from 0800am through to 0530pm each day from Smartair's base at Albury Airport.

Each morning, after a collective briefing on that day's exercise, students take to the sky, in turn, with the instructor beside them. After flying, it's right back down to earth because students need to study modules from the supplied theory books to cover the syllabus required for the pre-solo exams.

## How do I learn more?

Our instructors will be happy to discuss how you can build on your School Holiday Program experience to achieve the license that is right for you.

Get in touch with us through either email, phone or website and we will assist in any way possible.
